

Quantum Soul- and Post- Materialist Science Agriculture...

Blending Ancient and Modern Practices

My experience in the academe,
REVISITED

Public Invitation

Discover Dr. Pamela Fernandez, retired professor of UPLB, and find out how she was able to "get outside of the box" and into quantum agriculture and beyond!

June series of Modern Physics Meets Ancient Wisdom

Retired Faculty Member of the University of the Philippines at Los Baños and advocate of Sustainable Agriculture, Tao Science, Agricultural Science and Indigenous Wisdom

These events are organized by —

Cynthia Hamilton, PhD

Certified Master Teacher & Practitioner of Tao Academy™

<https://unifiedfieldbc.com/cynthia-hamilton>

The event, June 3, 2025

Welcome to Modern Physics Meets Ancient Wisdom!

Join us for a fascinating interactive introductory series where **cutting-edge scientific discoveries** intersect with **timeless philosophical teachings**.

Led by Cynthia Hamilton, PhD (Applied Science), dive into thought-provoking discussions, engaging presentations and practices, based on [Tao Science](#), co-created by a Tao Grandmaster and World Renowned Healer and a Quantum Physicist and String Theorist.

This is a unique opportunity to expand your awareness, connect with like-minded individuals, and explore the connections between **modern theories** and **age-old wisdom**.

Bring your curiosity; no pre-requisites.

Reserve your spot today!

Mondays from 02 - 30th June 2025 inclusive
5pm PT/8pm ET/11am AEDT (Tuesdays)

Outline/elements

1. Reflection on addition and subtraction
2. My field, Passion/Purpose
3. Problem on education: goal, content and process
4. Transformation on teaching emphasis, approaches, content
5. Tools in teaching, research extension
6. Quantum agriculture approaches for hopeless cases
7. Deep source of power
8. Post-materialist science global declaration
9. Key material sources: books, websites, articles that were used
10. Soul-based agriculture

Addition-Subtraction? A Tao class discussion

- PhD or Doctor of Philosophy - no longer a subtraction but addition – not about “philosophizing” but belaboring on data collection and publication
- Education is mostly addition... a Subtraction on the health of students, too much addition on years of schooling and memorizing, while under-developing their capacities, and a swerving away from their Purpose
- Quantumizing is subtraction... [Quantum?](#)

Small amount, less effort/work, less input

Subtle, simple

Fast action, wide reach, hi-tech or low-tech, **Multi-level effect**

Passion--- even after retirement...

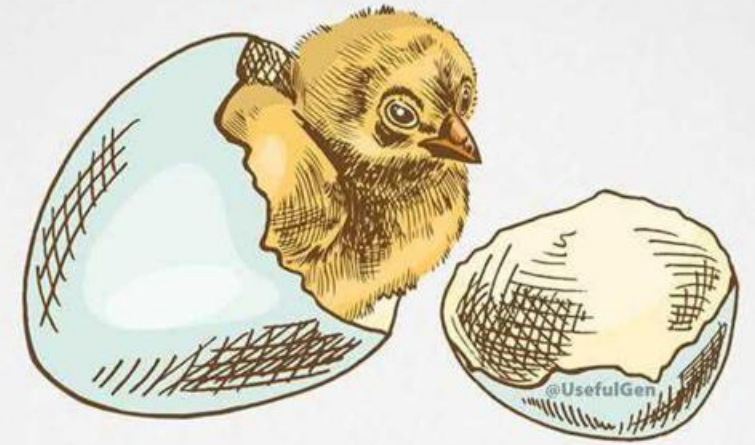

Right Education, Nature- based Agriculture

When it doesn't feel right, go left

"The one who follows the crowd will usually go no further than the crowd. The one who walks alone is likely to find himself in places no one has ever been before." -Albert Einstein

**Realize and
harness the
deep
workings of
Nature**

**If an egg is broken by
an outside force, life ends.**

**If it is broken by
an inside force, life begins.**

**Great things
always begin from within.**

An early reflection of my interest in alternative narratives... 2008

<https://www.quantum-agri-phils.com/MyBIOGRAPHYwithUPs.pdf>

- I got swept into the Sustainable Agriculture (SA) movement. The many facets of SA further propelled me to deeper approaches, into Ecological Agriculture then to Organic Agriculture. Thus my formal teaching and research as well as community service have been infused with the SA framework. Some 20 years into the journey (or in later part of the 1990's) I realized that even the deeper forms of SA lacked the power to truly engage people to adopting SA. Their effects were slow and did not effectively translate to consciousness change. While I tried to "walk my talk", changing lifestyle, having a small natural garden at home, and engaging in self-knowing, my relationship with SA expanded and deepened. I was searching for the root of change, for the synthesis level approach and one that would be simple yet highly effective; something that would elicit a quantum leap. And the answer came... "quantumizing" Sustainable, Ecological and Organic Agriculture! This was around 10 years ago, but only 5 years after that did the term "Quantum Agriculture" come into the picture. I felt reassured when, shortly after, I discovered that the expression is already abundant in the internet. It was affirming, and I also found my kindred spirits there.
- The journey expectedly encountered some challenges; despite proof through phenomena and experiments, and presence of well reviewed articles published by reputable scientists, skepticism (even hostility and indifference) was the general mode. But there are searching souls in many places, and this web site is for them. This web's mission is to let people, especially students and the general public, have a site to visit if they are curious to know more of, or about the "quantum" world, or want to get a glimpse of new frontier science that had already been in human consciousness since the beginning of time. It is also to see what is happening in my sphere. The most recent exhibit called Syensaya for Fun-Science, which was held in the academe (University of the Philippines Los Banos) last July 28-30, 2011, propelled me to have this website. An idea of the Quantum Agriculture exhibit and its contents and intent may be found in the "events" section of this website. I shall work to fill this site with materials that would enliven this framework and dimension. You can help make it more alive with your postings and contribution. Be part of the wave of change!
- **CONCLUSION: "We must always change, renew, rejuvenate ourselves; otherwise, we harden." — Johann Wolfgang von Goethe**

Not emphasized in education

Education (that of Agriculture included) has departed farther and farther away from the true workings of Nature and the Human Being

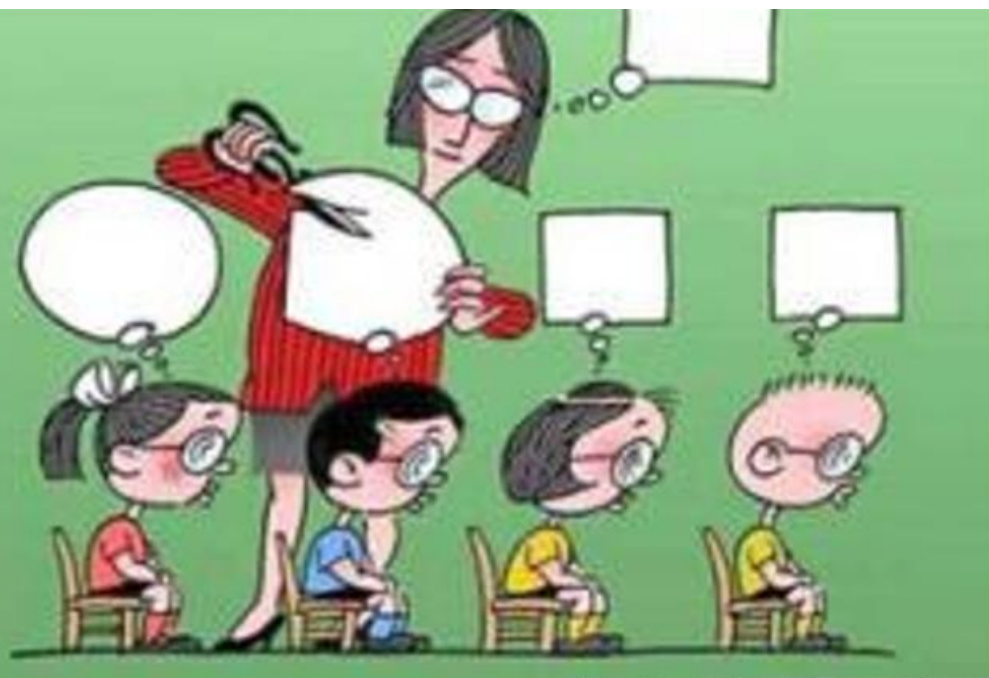

- We are producing food that have departed from the true essence of man.
- We lack discernment, and became trapped in harmful doings
- We lack the life force and will force to do what we ought to do
- **View this in terms of frequency...**

HIDDEN FACT

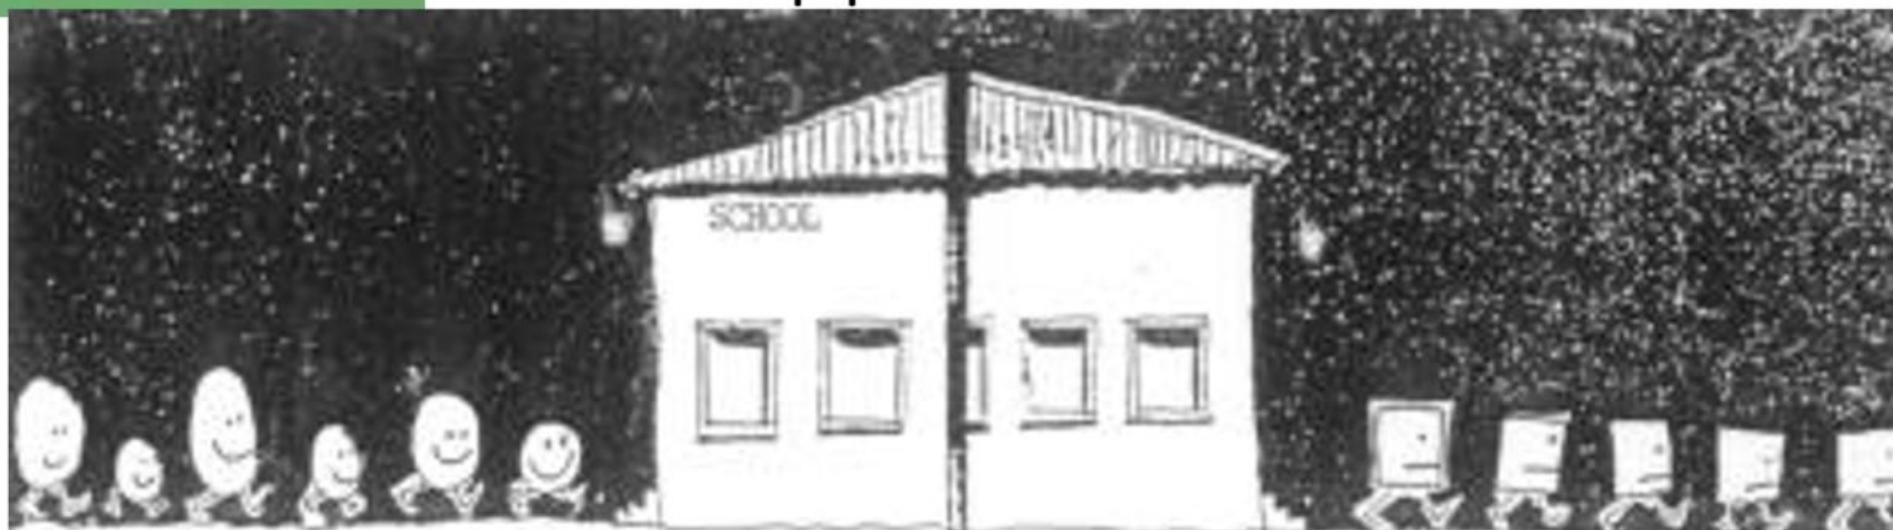

Food has a frequency. Ultra-processed foods are between 0-5 MHz. Organic foods are between 50-160 MHz. Super-foods and Heirloom plants are 160-210 MHz. "Nutri-medicinal" substances like herbs, Irish Moss, Shilajit and medicinal mushrooms are between 210-320 MHz. Consuming these high frequency substances have been regarded by Yogis and Monks as a way to raise your own frequency, which can result in heightened consciousness, vitality, higher thought forms and stronger intuition.

Education has been to
make us slaves or un-
humans – Homo nada

Human Soul is negated,
suppressed

My journey to an alternative world brought me from chemical agriculture to ... Sustainable Agriculture and beyond...
to RAISING CONSCIOUSNESS

Sustainable Agriculture 7 features, dimensions

Now even more relevant

1. Ecologically sound
2. Economically viable
3. Social justice, humaneness, equitability, empowerment
4. Cultural appropriateness
5. Grounded on Holistic & Integrative science
6. Appropriate technology
7. Full development of human potential...*the forgotten, token dimension*

Trivia:

Science evolves, has half-life...
Agriculture science ___ years?
Earth, humans and all else are
also evolving, including
societal developments

Infinite possibilities... There is always a way

New Science:

DON'T LET YOUR LANGUAGE WASH YOUR BRAIN

At this point you might object: “You want people to believe that underlying the visible phenomena of the universe there is a realm of the physical reality that doesn’t consist of material things or fields of energy, but of ideas or mathematical forms, and that these forms are real, but nobody can see them? No matter, no energy, just ideas, mathematical forms, or patterns that exist as hidden states in all things, and everything that we can see comes out of them? You must be kidding me!”

Your reaction, if you indeed reacted in this way, is quite normal. There is something in us that leads us to expect, without even thinking about it, that only material things are real; that things, to be real, must be made of stuff—matter—to be of significance. I think that our language has a lot to do with this attitude, because it tells us that if a thing isn’t important, it *does not matter*. What does that mean? It means that if it isn’t made of matter it isn’t important.

[Infinite Potential by Lothar Schafer | PDF | Atoms | Electron \(scribd.com\)](#)

Lacking in modern materialist science agriculture education...
Quantum aspects, the Spirit, the Consciousness the Unified
Field! Or the complete knowledge of Natural Law

“Unified Field” synthesizes...
matter + spirit = **Nature**

Now there are fields like:

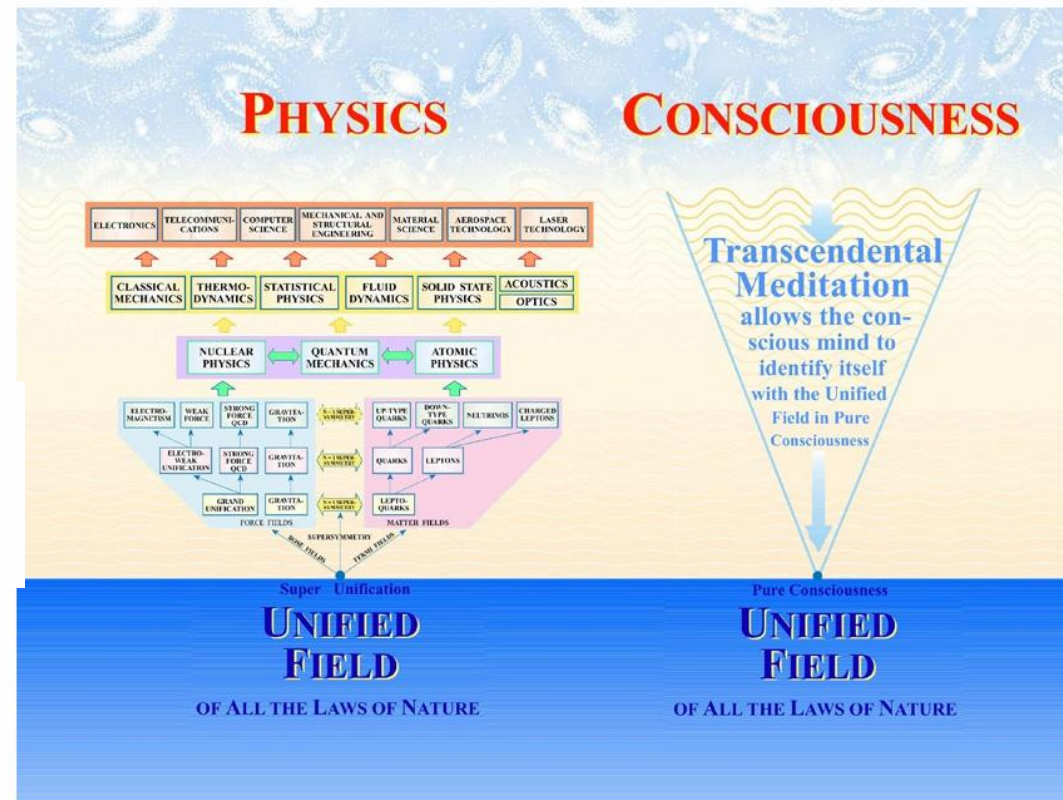

Quantum Chemistry
Quantum Biology
Quantum Agriculture
Quantum Medicine

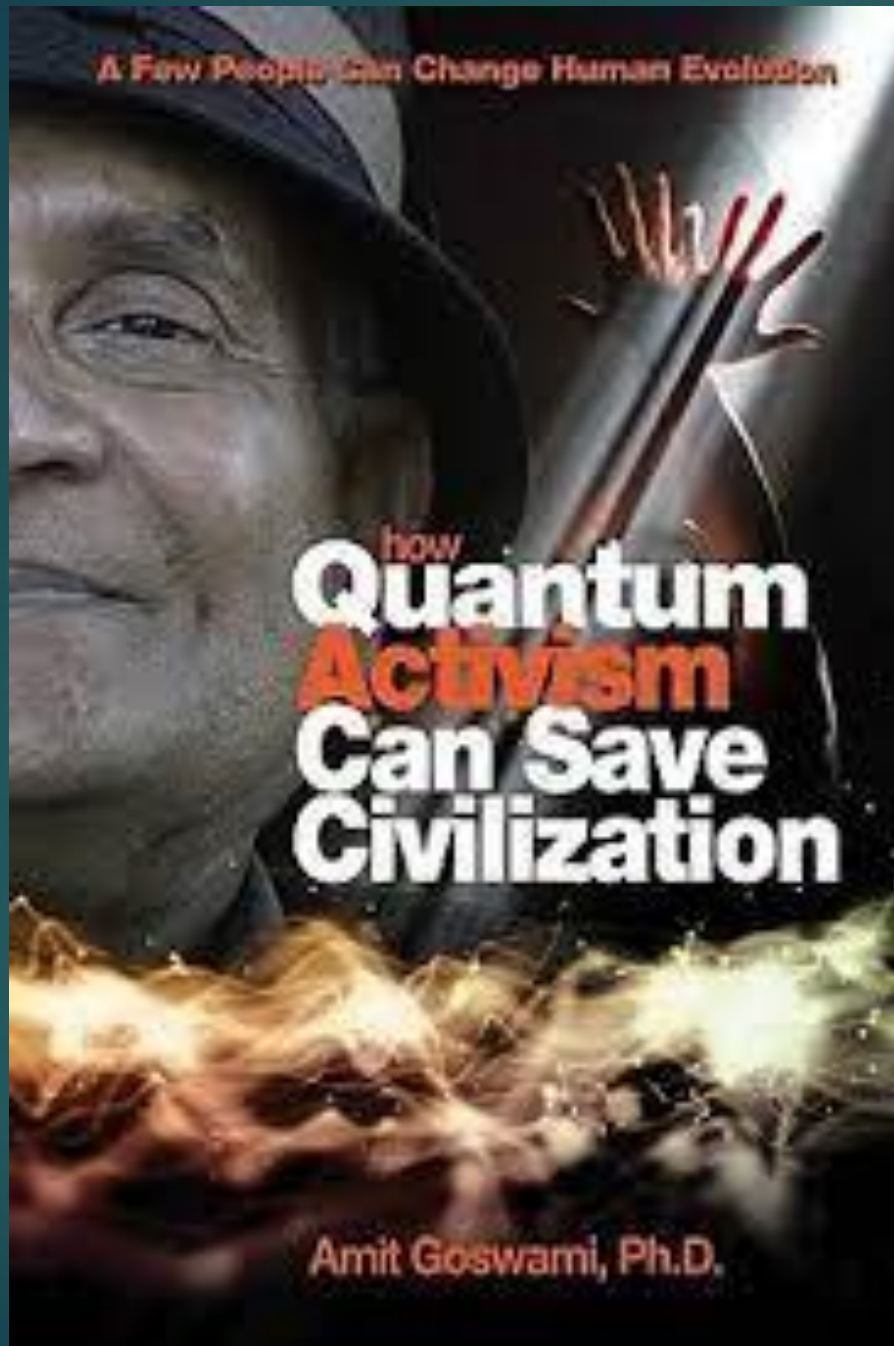

... For Nothing escapes from becoming real
(matter) when it is in our consciousness.

Quantum Sustainable Agriculture validated by Post-Materialist Science

November 13th, 2019 ▶ Write comment

Warm greetings! I am back after a long pause... Now, I have some very good news to share... The **new science** and **spirit science** is taking prominence in the world today, affirming the scientific validity and value of Quantum Agriculture. Scientists, medical doctors, researchers, academics, thought leaders and other prominent globally known change agents have banded together to declare that **the new science, now formally called Post-Materialist Science, has overtaken Materialist Science** in prominence and in many other respects. The proofs of this science' validity and effectiveness are overwhelming, undeniable and much more than those on aspirin. Two notable documents have emerged in this regard, namely:

1. **[A Manifesto of Post-Materialist Science](#)** (2014). The **Manifesto** was prepared by a group of internationally known scientists, from a variety of scientific fields (biology, neuroscience, psychology, medicine, psychiatry), who participated in an international summit on post-materialist science, spirituality and society... The summit was held at Canyon Ranch in Tucson, Arizona, with the purpose of discussing the **impact of the materialist ideology on science and the emergence of a post-materialist paradigm for science, spirituality, and society**. It resulted to 18 strong conclusions that may shock the uninitiated, but this truly is a subject that has long been in the offing. The conclusions made were as follows:

1] The modern scientific worldview is predominantly predicated on assumptions that are closely associated with classical physics. Materialism... the idea that matter is the only reality... is one of these

There is so much interest nowadays on indigenous knowledge systems. Researchers are curious what may be useful to meet current challenges. Bioprospectors are hoping to make commercial value to their find. The subject of ethics is primary in this kind of study (a discourse on this: <https://www.devcom.edu.ph/site/dr-flor-shares-insights-on-indigenous-knowledge-research-with-devcom-students.html>), while validation of the applicability of the practices may be constrained by the lack of holistic view and approach of researchers. When practices only include those that are in the realm of the 5 senses (or those in the material/physical), not much progress can be made. When practices beyond actual farming/gardening practices are included progress may be achieved, but only if the science is expanded and include the non-material or spiritual science (e.g., that of anthroposophy of Rudolf Steiner). To see indigenous or local practices in a better light, we need to consider what our world is made of beyond the physical, and what the role of consciousness is to make thoughts and intentions become real. Agriculture provides a rich material for the discussion. Quantum agriculture encompasses both material and non-material aspects. Below is an article that I wrote to expand the discussion on some fundamental subjects...

Is belief the only factor for the experience, or is there another science to this practice? <https://religionnerd.com/2011/06/02/firewalking-as-spiritual-transformation/>

WAVE OF CHANGE

A new wave of change is here. This wave permeates all aspects of human and earth existence. On the other hand, new knowledge is being revealed and new tools are being developed to answer current challenges: illnesses, pests and diseases, climate changes, calamities, etc. Approaches have been 2-pronged: one hangs on to the old mechanistic reductionist model, the other explores what is beyond that, as well as the fundamental role of human beings in addressing all these challenges in a synthesis way. Einstein's premise is that we cannot find solution to our problems with approaches that come from the same framework that created the problem in the first place. These solutions must be coming from outside the box. And that outside the box space has been there all along, among ancient practices and teachings, and is now confirmed by the new science of "quantum".

The New Science: Implications for Advancing Initiatives by Nicanor Perlas

March 30th, 2013 · Write comment

If we want to effect sustainable change, we need to do it scientifically. But which science, knowing that science is not neutral, nor fixed, nor without flaws? Here is a documentation of a talk by Nicanor (Nick) Perlas delivered in 2009 at the SEARCA grounds in UP Los Baños. Four years later more scientific developments may be cited, but the presentation still carries basic truths. Many from the academe are still to know or accept many of the concepts that are already known and mainstreamed in the outside circle.

The Evolution of Science

I will share with you some of the developments of the new science and the implications for taking initiative. This is timely, since we are in an academic setting, and because what is going on out there, abroad, or in the mainstream is pretty amazing. As a scientific institution it would be good for you to catch up a little bit on the new science developments.

But first we look at the origins of the university. The "university" started over 2000 years ago in Greece, in the academy of Plato, the Lyceum of Aristotle, which then became the basis of the universities of the Middle Ages. The university concept first emerged out of Europe then got exported to the US... then brought here (just in the last few decades) in the universities. Now we have what is called the university system. One of the main aspects connected to the university system is the whole process of knowledge. Such knowledge can actually transform the foundation of who we are, and to what we can do to shape the world.

The science that we are normally being introduced to in the academe becomes a very important part of our formal education. Unfortunately, some of the assumptions of a lot of scientific research are stuck in the 19th century. While science has actually moved on quite a bit, there are a lot of amazing discoveries in many different fields of science. In this talk I will give some examples of some of these discoveries, then try to create a picture of what these discoveries mean to us as humans, for society, as well as to where the world is going. Then I shall subset that into a kind of practical mode, to answer the question: *given the new science what does it mean if we want to start an initiative?*

[Read more.](#)

Receive some new impulses:

Ex. Frank Chester validating Steiner' teaching that the heart is not a pump

Quantum Agriculture ... here we know culture, nature and deep science are intertwined. The heart's sacred geometry is in every aspect of nature and the cosmos. The heart is where true transformation begins: The Heart of the Revolution is the Revolution of the Heart. If this is true then we can approach agriculture through the heart, which is also more intelligent than the head brain. From the heart we can intuit various ways to help agriculture and heal the earth. Many approaches to do these and that are "quantum" have already been found, and many are already practiced since the beginning of time.

Sacred Geometry, the Heart... they are about Quantum Agriculture

July 26th, 2012 · Posted in Agriculture, Crop Science · Animals · Cosmos, Universe · Earth, Environment, Elements, Energies · Education · Health and Healing · Human Development, Transformation, Self Knowledge · Indigenous knowledge · Practices, Technology, Approaches · Quantum Agriculture (Biodynamic, Agnihotra-homa, Vedic, Yogic, Shamanic, Intuitive, etc) · Sacred Geometry, Symbols, Formative Forces Science · Societal transformation, Threefolding · Spiritual science · Write comment

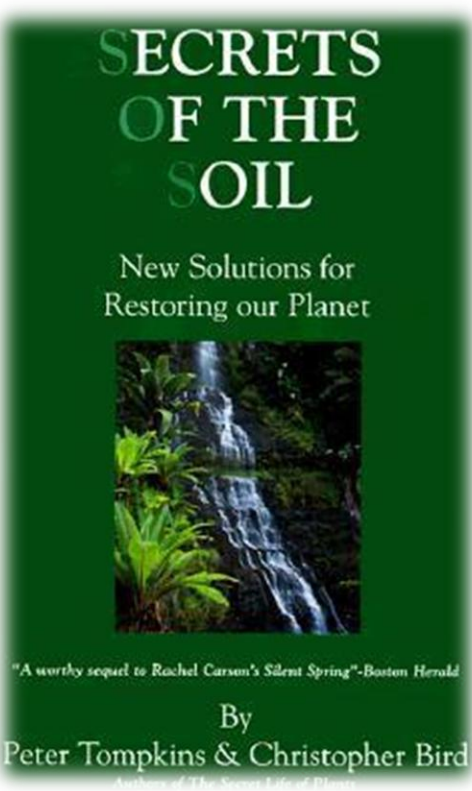

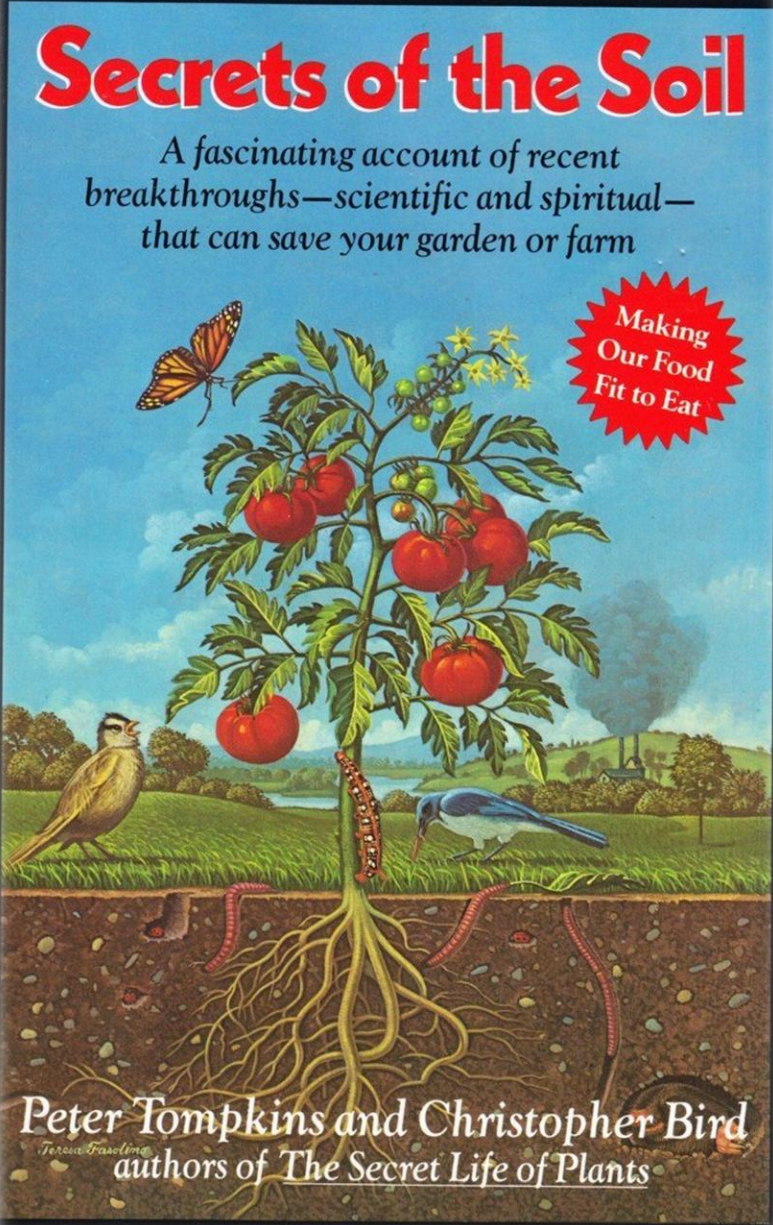

Quantum Agriculture is about sacred geometry or formative force. Without such organizing or life force, we would have nothing. Such force is derived from the "information" realm, turned into "energy" then into substance or matter. I got inspired by the book **"A Beginner's Guide to Constructing the Universe. The Mathematical Archetypes of Nature, Art and Science"** by Michael Schneider. HarperCollins Publisher, NY, 1995. It presented Math so beautifully and clearly. If only this is used as resource in the mainstream education curriculum. I learned about the book in my searching for Waldorf books for our daughter. Quotes have power; they also inspire and illuminate. It is in that light that I put them together and share [here](#). There is a lot of inspiring information and truths one may obtain from the quotes alone. The book is left and right brain combined... a good way to integrate art into natural science and other fields. Visit this site for more info or related materials: <https://www.constructingtheuniverse.com/>. This too. <https://www.harpercollins.com/browseinside/index.aspx?isbn13=9780060926717>. Free download here: https://ebookee.org/A-Beginner-s-Guide-to-Constructing-the-Universe-Mathematical-Archetypes-of-Nature-Art-and-Science_1113366.html.

And I found this site which gives more sacred geometry quotes:

EARLY QUANTUM REVEALS ENCOUNTERED

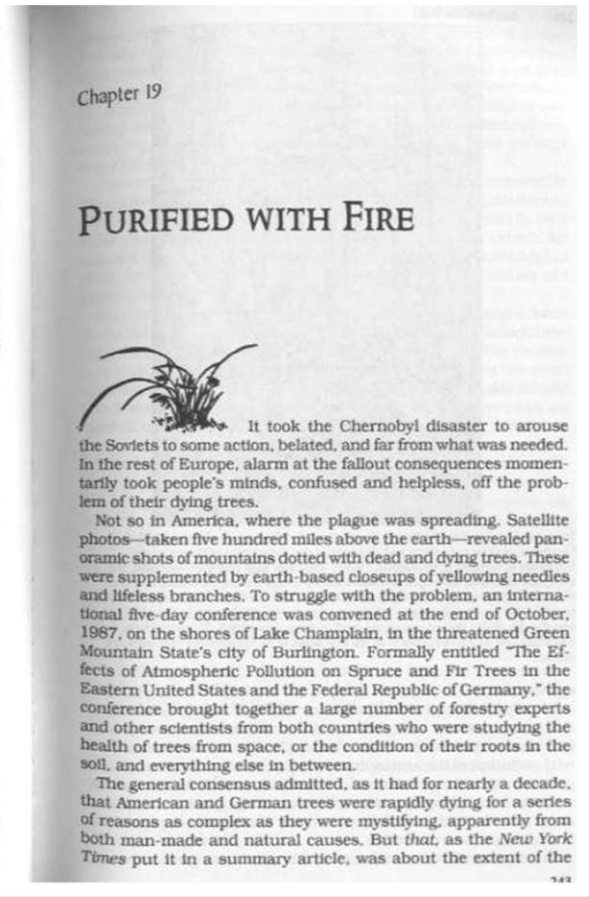

242 Secrets of the Soil

the opportunity to do so. We are close to the upper limits of reversibility. And the United States is the only country with the power and the influence to lead the world into a massive environmental and economic cleanup. So far, we've left it to the "experts," and you can see the mess they've made. They've left us 375,000 toxic waste sites to be cleaned up in the USA alone."

"To FDR's Four Freedoms we must add the freedom to have clean air, clean water, vital food, and the right to pass on to our children a world that's fit to live in. This earth can support a lot more people. With a little bit of intelligence, we can support them all in a way we've never seen before. There's glacial till that's thirty to fifty feet thick in North and South Dakota; we can grind it up and move it into Iowa, Illinois, Kansas, Nebraska, Colorado, Texas and Wyoming for vital soil and vital crops. Meanwhile, until we grow more healthy food, the algae can bring us all the elements we lack for a revitalized, enduring health. The blue-green algae is a gift from heaven. But it may be the last we get if we don't shape up. We can talk about the future, and visualize the future, but if we want that future we must act."

A different approach to teaching... more discussion on practices that are in the subtle realm... quantum-based research

- ▶ **Dialogic, participatory, Art infused, draw from indigenous knowledge systems**
- ▶ **Purpose-based**
- ▶ **Incorporate new science in teaching, research, extension**
- ▶ **Dive deeper on indigenous practices and invitation to give scientific basis**
- ▶ **Going into global issues, those that are “outside the box”**
- ▶ **Consider non-mainstream sources of information**
- ▶ **Offer a subject- Quantum Agriculture, or infuse existing courses with it**

Quantum Agriculture (QA), Renamed
2006 -----> -----→ 2018

QA Course objectives

For the students to:

1. Describe current trends in science, esp. new frontier holistic science, and their application to agriculture and the greater environment,
2. Define some energy and information concepts related to agriculture
3. Explain the science behind energy-information agriculture practices and indigenous knowledge systems and approaches,
4. Relate and demonstrate some simple “quantum” practices or their phenomena and articulate their scientific basis.
5. Design a development project that integrates learning into one’s own discipline or major course, or plan an approach for the popularization/spread of energy-information agriculture approaches.

Bios - Life

Dynamis - Force

Farming with life forces

Use of ...

Biodynamic calendar'

cosmic configurations and rhythms

moon, planet, constellations

Biodynamic preparations – to enhance soil quality, stimulate plant life, help moderate and regulate biological processes, enhance and strengthen the life (etheric) forces of the farm.

The preparations are used in **homeopathic** (*super diluted*) quantities

Biodynamic – first certified organic;
 basis of international organic certification...
 Harnesses intelligence and energy from
 earth and sky (Telluric/earth and cosmic
 forces)

BIODYNAMIC PREPARATIONS

Biodynamic farming makes use of 9 special preparations that are used to maintain the health of the farm eco-system. Each preparation has its own unique way to produce and plays a specific roll in nature as indicated below. At Avondale, we apply the preparations in both the normal spray methods as well an innovative Field Broadcaster.

	PREPARATION	WHAT ARE THE PREPARATIONS USED FOR
	BD500	Basic lime polarity-calcium, nitrogen fixation, digestion, nutrient elaboration, transformation and coherence. Builds a healthy soil foodweb and boosts soil organization.
	BD501	Basic silica polarity-photosynthesis, blossoming, fruiting and ripening. Good for flavour and keeping quality. Maximizes sunlight and atmospheric organization.
	BD502	Works with sulphur, potassium and fluid flow. Recycles urea into protein. Good relationship with copper.
	BD503	Works with digestion, calcium/amino acid complexes and nutrient uptake. Good relationship with zinc.
	BD504	Works with calcium, proteins, magnesium, iron and phosphorus in energy transactions. Works with chlorophyll and haemoglobin as well as other enzymes and hormones. Also works with silicon.
	BD505	Uses calcium and carbon to reduce nitrates to amino acids in both soil and leaf. Limits lush, undisciplined growth. Promotes good form. Protects against diseases and fungal attacks – use with 508.
	BD506	Works with silica and potassium. Great for fruit set and fill. Improves size and appearance of fruit if used with BD 503 and horn clay.
	BD507	Works with phosphorus between the male, lime and female, silica streams to promote heat and flowering. For fruit set use with BD 506. Can be used to protect from light frost.
	BD508	Works with amorphous fluid silica to strengthen cell walls, connective tissues and transport vessels. Hardens and prevents weak, watery growth. Used on soil, 508 stimulates mycorrhizal growth. Promotes internal warmth and is good for ripening fruit.

Agnihotra (& Homa Therapy) ...

Sound -related science & technology

*Agnihotra not only helps in reducing pathogenic bacteria and other pollutants in the air, but also purifies water resources in the surrounding areas. Agnihotra homa ensures healthy air and pure drinking water – thus providing a strong foundation for good health.

LATEST AGNIHOTRA VIDEO: [Agnihotra - Homa Therapy 4k](https://www.youtube.com/watch?v=tnSzK9Mijr4)
<https://www.youtube.com/watch?v=tnSzK9Mijr4>

THE SCIENCE

There is a sound that emanates from the Agnihotra pyramid.

Agnihotra has the ability to neutralize pathogenic bacteria.

Much energy, much positive energy, much healing energy emanates from the Agnihotra pyramid.

Shree Vasant V. Paranjpe:

Agnihotra works on body, mind and soul.

It **cleanses body** of ailments, your mind of clutter, of stress, and negativity; and

Purifies the soul. It strengthens your aura

COWS

Agnihotra's science...

Holistic Science, Vedic Science --> → Post-Materialist science

Another list of benefits:

- [Homa Hof Heiligenberg - Healing of the atmosphere through Agnihotra](#)

Commonly observed benefits of Agnihotra worldwide:

- ✓ It helps to restore the ecological balance.
- ✓ The weather is harmonized.
- ✓ Negative ions are produced, which are important for clean air and for energy production in the body.
- ✓ Rich and nutritious food production becomes possible.
- ✓ Supports the health of humans, animals and plants,
- ✓ it facilitates addiction cessation,

- ✓ reduces the risk of epidemics spreading,
- ✓ protects against radiation effects.
- ✓ It decreases stress and anxiety,
- ✓ harmonizes body, soul and spirit,
- ✓ supports the positive development of children,
- ✓ promotes better interpersonal relationships.
- ✓ The life energy (prana or chi) is strengthened and can flow harmoniously again.
- ✓ It promotes our own inner growth.

Farming application of Agnihotra

Atuning to the power of the SUN

Ancient knowledge & practice, re- revealed

Healing power reaches 1-20 km radius

AGNIHOTRA: Quantumly cures the Earth...

What is Agnihotra?

- process of **healing & purifying atmosphere** through the **agency of fire** during the **circadian biorhythm** of **sunrise and sunset**.
- part of **ancient Vedic practices** in medicine, agriculture & climate engineering.

Derivation of Words:

Agni means **fire**
Hotra means **Healing**

Subtle Energies from Agnihotra

- Evoke or reinforce our own vital energy, subtle energy, life force, bio-energy, bio-plasmic energy, prana.
- **Kirlian photography** (for aura) captures this energy pictorially.
- Other device (psychotronics, oscilloscope) can demonstrate changes in subtle energies & life forces.

What Happens during Agnihotra?

- At sunrise, the many fires, electricities, ethers and more subtle energies emanating from the sun extends to the earth.
- It produces a flood of effect at those coordinates where the sun appears to rise.
- The energies are captured within the pyramid and thrust 12 km. into space by fire & 1 km. radius around where there is a layer with "quantum-cosmic" particles and nutrients.
- This flood of energies returns to the pyramid and rebounds **bringing nutrients** and love into the surroundings which nourishing plants, animals and human life.

- The Agnihotra mantras are the quintessential sound of that flood.
- At sunset the flood recedes.
- A practice done at exact **sunrise & sunset** to catch that highly powerful energy (**ephemeral, 30 sec.**).
- Creates a **vortex** of energy from the pyramid to attract the strong healing energy from the sun specific at those moments.
- The contents that are aflame become **transformed**. Together with the **energy contents**, are able to **purify the atmosphere and other earth components**.
- The resulting **ash** has various **healing applications**.

Latest version of Quantum Agriculture- Soul Agriculture or Soul-based Agriculture

SOUL-based
AGRICULTURE
is about following the
“TRUEST NATURE”

The basic theme or principle of being
ORGANIC: according to the “true nature”

Firstly, we need know about the true nature of... NATURE

WHAT IS THE TRUE Nature of ...

... Crops, plants, seeds, animals,
humans?

... Earth, soil, air, water, light, sun,
fire?

... Cosmos, Universe?

... SOUL?

EXPRESSION of the SOUL's intelligence

Did we know... what a living system does when healthy?

1. Self-creation (autopoiesis)
2. Complexity (diversity of parts)
3. Embeddedness in larger holons and dependence on them (holarchy)
4. Self-reflexivity (autognosis/self-knowledge)
5. Self-regulation/maintenance (autonomics)
6. Response ability to internal and external stress or other change
7. Input/output exchange of matter/energy/information with other holons
8. Transformation of matter/energy/information
9. Empowerment/employment of all component parts
10. Communications among all parts
11. Coordination of parts and functions
12. Balance of Interests negotiated among parts, whole, and embedding holarchy
13. Reciprocity of parts in mutual contribution and assistance
14. Efficiency balanced by Resilience
15. Conservation of what works well
16. Creative change of what does not work well

Main Features or Principles of Healthy Living Systems

Elizabet Sahtouris:

In my scientific worldview, the universe is consciousness creating living systems within itself; thus ALL living systems are conscious, intelligent and can learn. This fundamental assumption, for example, permits one to see the transparency implications of features 4 and 10.

Early crop science exhibits and projects all had elements of Quantum Agriculture

The events were animated by my students and friends from inside and outside the academic community

Following are concepts or posters that were put up in exhibits

Wisdom from Nature:

Quantum role of animals, plants, microbes, substances, etc.

- *Birds sing for plants, other animals communicate to other species. Plants, too*
- *Feces and other body secretions are used as medicine/for healing*
- *Animals indicate disasters*
- *Mushrooms cleans air*
- *Plants sing and respond to music (like protein music [The mysterious singing of plants. By Henk Kieft. - Music of the Plants](#))*
- *Etc.*

Everything is multipurpose, with polarities power
Used as medicine

Arthropod Scavenger Cousins

The Cockroach of the land

The Cockroach of the sea

FACT: Arthropod Scavengers; the decomposers of the earth not fit for human consumption. They were meant for the consummation of dead rotten flesh to keep the earth clean of corruption. Also, they are fluid sucking parasites that spread sickness and death.

Who would think of eating a cockroach? Yet the shrimp is considered the cockroach of the sea in the arthropod family...along with the crab, lobster, tick, flea, mosquito, spider...etc. To consume these creatures as food is an invitation for all manner of disease, allergies, and sicknesses (diagnosed/misdiagnosed).

Is it any wonder that the Bible says: "You shall not eat the unclean thing..." (Lev. chapter 11).

Pest epidemics?

Do “Peppering” or Ashing

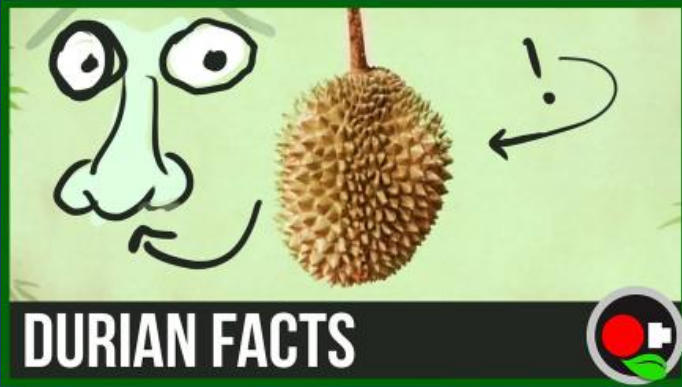

Releases the organism from its physical boundary, destroys its connection (in terms of fertility) from the cosmos, so next generation becomes sterile.

However, for agnihotra-
no life taking/destruction; only life giving

A tbsp of ash in water that is enough to cover a hectare, but first vortexed in 2 directions for about 20 min

<http://www.biodynamic-research.net/ras/rhythms/ash>

The problem is the solution; What ails you cures you; Like cures like principle (*homeopathy; law of similar; super dilution*)
Find the solution from another part, or from an extract of the same part

Harness polarities

Basically, a homeopathy principle, a polarity, expansion-contraction phenomenon...

Power of symbols, writings, pictures

Drawing (smiley vs frowny) on eggshell where seeds were sprouted, gave different results

Invisible Helpers

Nature beings, spirits, other forms of consciousness are awakening us

The new science confirms them-
the invisibles (our helpers)

This is about... Science reconnecting with
the forces and intelligence of nature...

Lady Makiling... the
Diwata

... "without them there will be no
agriculture"... R Steiner

ROOT

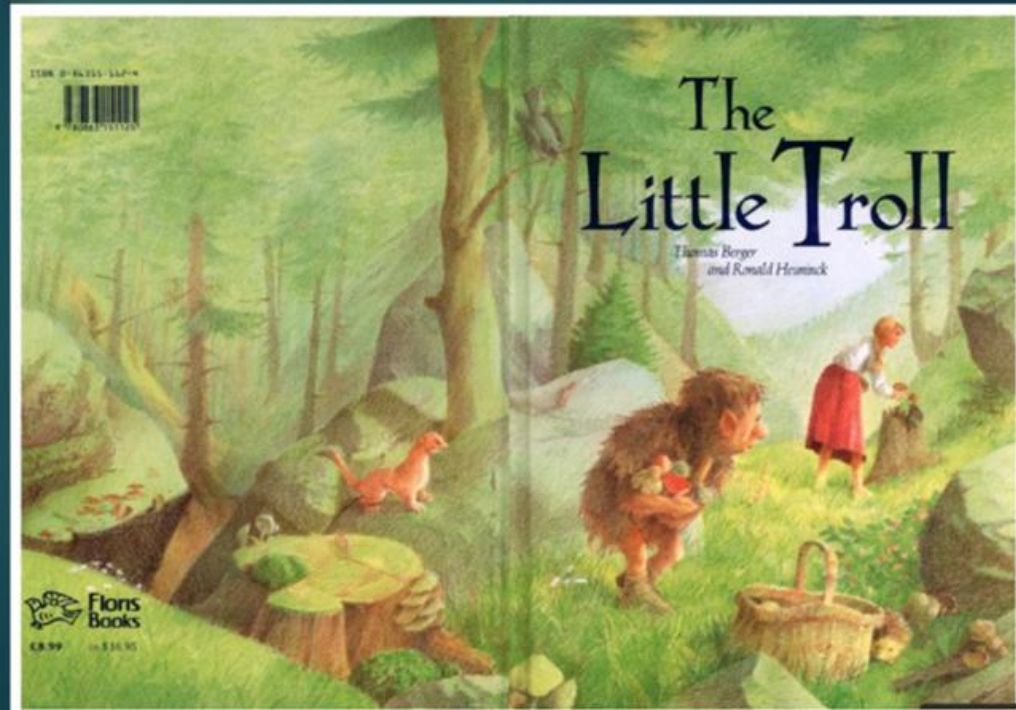

LEAVES

FLOWERS

FRUITS, SEEDS

Global issues, threats on nature, humans and
Agriculture: Chemtrails, HAARP, 5G, salt iodination,
fluoridation, graphenes in almost every product, directed energy
weapons, Covid, consciousness wars, etc.

Heating the Sky With HAARP

Plus other disclosures

- Ancient beings and civilizations
- Earth story, World and Universe history
- Off-earth beings and realities
- Hidden twisted facts, science and technology
- Etc.

So much are being revealed nowadays

Old conventional beliefs need reformatting

With acceptance of the given narratives, we need to follow through; integrate them in our consciousness and will.

- ❖ The earth and all that is in it are evolving, aligning with the trajectory of the universe, if we do it right (free will)
- ❖ **Materialism is now subset to Post-Materialism**
- ❖ **The rule of nature is cooperation and not competition.**
- ❖ Plants eat their nutrients from the soil not drink it (as in the case of chemical fertilizers, hydroponics).
- ❖ We are strongly affected by the moon and other cosmic bodies.
- ❖ Gene is affected by the environment, and our thoughts/intentions.
- ❖ When we die, our thoughts, learnings vanish persist. We live beyond death and we come back to new bodies.
- ❖ Science and religion speak of the same truth but in a different language. They are now merging.
- ❖ **All is imbued with Spirit. When we act according to this, our actions will be laden with power.**
- ❖ **Indigenous Knowledge and practices can now be backed by science.**
- ❖ The invisibles: Belief, thoughts, subtle food properties impact on our DNA and our morphic field.
- ❖ The heart is not a pump. We are now developing even newer capacities of the heart
- ❖ We have more than this life.
- ❖ **Our thoughts reside outside our brain.**
- ❖ The heart is more intelligent than the heard.
- ❖ **Spirit and the other realm manifests... OBE and NDE are real.**
- ❖ **Observation changes matter.** Communication is a universal operation. When conducting an experiment the observer does not influence the results.
- ❖ **Each one has a specific PURPOSE, sacred contract.**

Our thoughts and worldview dictate our action, our approaches.

Organic can still be in material sense.

worldview 1: matter as particle

when perceiving the world as particles, man supports plants with particles

1 plant and animal

life processes

bio-chemical metabolism

techniques

manure
chemicals

(Organic) Agriculture

worldview 2: matter as wave

perceiving the world as waves as well, man supports plants with waves as well

2

1 plant and animal

life processes

vibration + resonance

techniques

sound
magn impulses
high frequencies

ElectroMagnetic Agriculture

worldview 3: information + intuition

perceiving a quantum world, man supports life with subtle energy, mind and heart as well

3 quantum field

2 wave energy

1 particle

life processes

quantum field information

techniques

intuition
subtle energy
mind

Intuitive Agriculture

In a layman or generic sense, worldview 2 and 3 may be loosely considered quantum (realm of invisible)

Latest study- PhD Dissertation 2024

SEED INVIGORATION AND CROP PERFORMANCE OF MILLET (*Panicum miliaceum* L.) UNDER VARIOUS POST-MATERIALIST SCIENCE AGRICULTURE PRACTICES.

MF Itang, UPLB

Field crop- and lab germination performance; paper chromatography

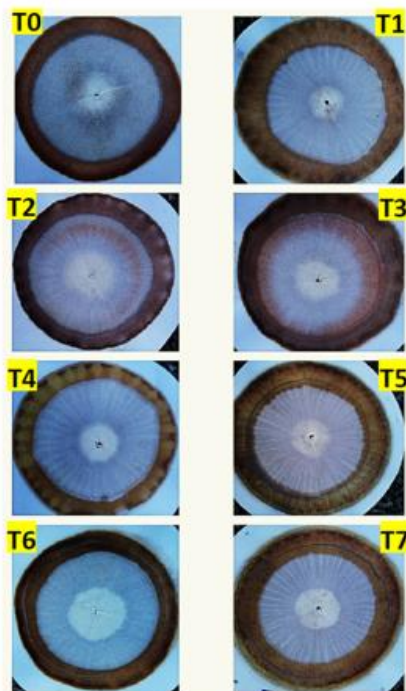

Figure 20. Circular chromatography of millet seedling extracts from seeds given invigoration treatments in trial 1. T0 - no invigoration, T1 - tap water, not vortexed, T2 - tap water, vortexed water (VW), T3 - BD500 in VW, T4 - agnihotra ash in VW, T5 - UFE in VW, T6 - CPP in VW, and T7 - ipil-ipil wood ash in VW.

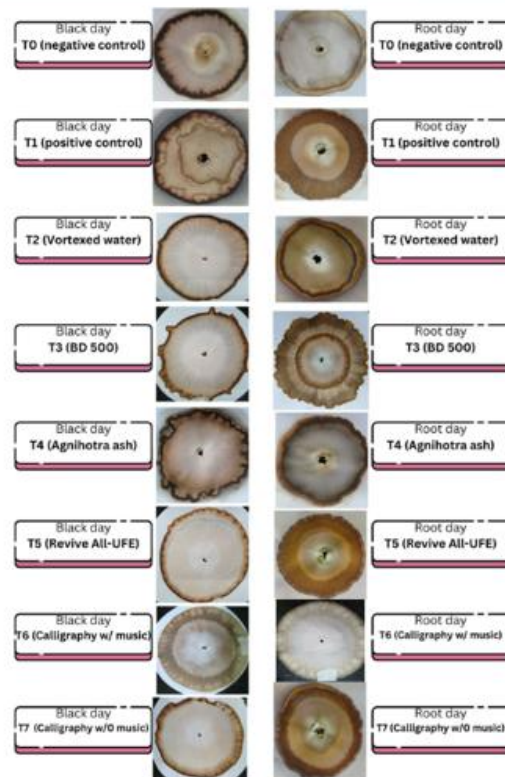

Table 12. Crop growth rate ($\text{g m}^{-2} \text{day}^{-1}$) of kabog-millet at 42 days after sowing ($p \leq 0.001$)

TREATMENTS	Crop Growth Rate ($\text{g m}^{-2} \text{day}^{-1}$)	
	Black day	Root day
No invigoration	-	-
Tap water	1.46cd	1.58cd
Vortexed water	1.63c	1.86c
BD500	1.15d	2.81b
Agnihotra ash	1.59cd	3.42a
Wood ash	1.41cd	1.50cd
Mean	1.45	2.23

Means with the same letter are not significantly different using LSD .05 alpha

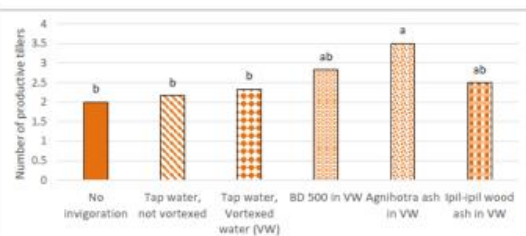

Figure 30. Kabog-millet number of productive tiller given different invigoration treatments ($p=0.007$). All seeds that were invigorated were pre-soaked, in vortexed water and re-dried. Treatments with common letters on top of bars are not significantly different using LSD .05 alpha

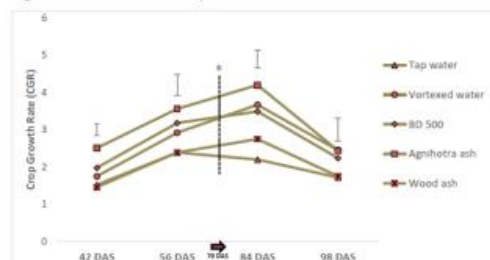

Figure 29. Crop growth rate ($\text{g m}^{-2} \text{day}^{-1}$) at various growth stages of kabog-millet as affected by the two sowing times (root day and black day) based on the biodynamic calendar and invigoration treatments: 42 days after sowing (DAS), 56 DAS, 84 DAS and 98 DAS. All seeds that were invigorated were pre-soaked, in vortexed water, and re-dried. Vertical bars indicate \pm SD. *P<0.05, **P<0.01, ***P<0.001. Data taken from MF Itang, 2024.

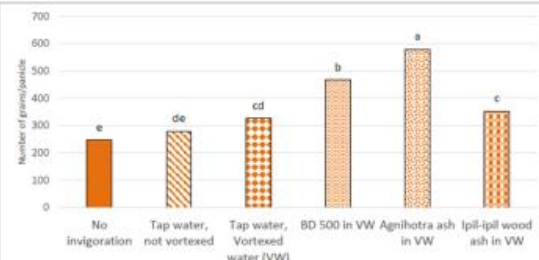

Figure 32. Kabog-millet number of grain panicle m^{-2} from crops given different invigoration treatments ($p \leq 0.001$). All seeds that were invigorated were pre-soaked, in vortexed water and re-dried. Treatments with common letters on top of bars are not significantly different using LSD .05 alpha

As we are now scrambling for effective, deep, strategic, and lasting solutions in agriculture, we need to go beyond the physical, to beyond matter, to Creation principles

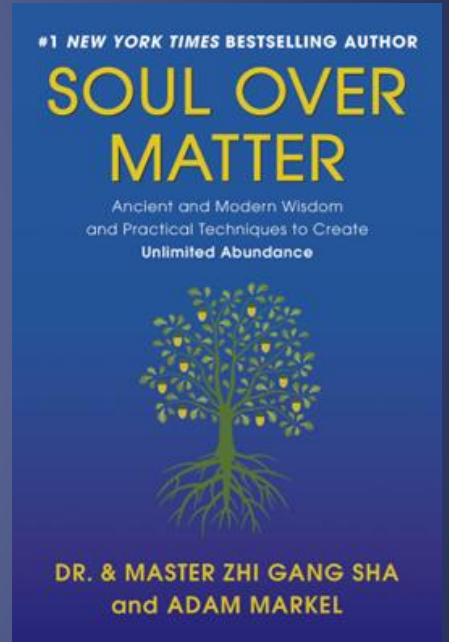

my latest version of Quantum Ag:

SOUL-based Agriculture

Soul-based Seed Technology

My major responsibility in the academe

**It is no longer “mind over matter”
BUT “soul over matter”**

Take heart:

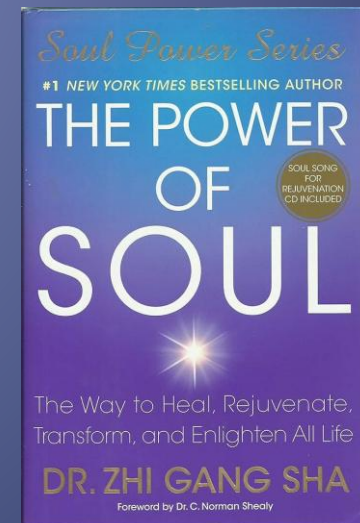

Anything and everything has a Soul,

Nature, Animate, inanimate things, processes, relationships have a soul

and since Soul is the Boss,

The other aspects will follow: Heart, Mind, Energy and
Body/Matter

There is a way to access and harness the soul

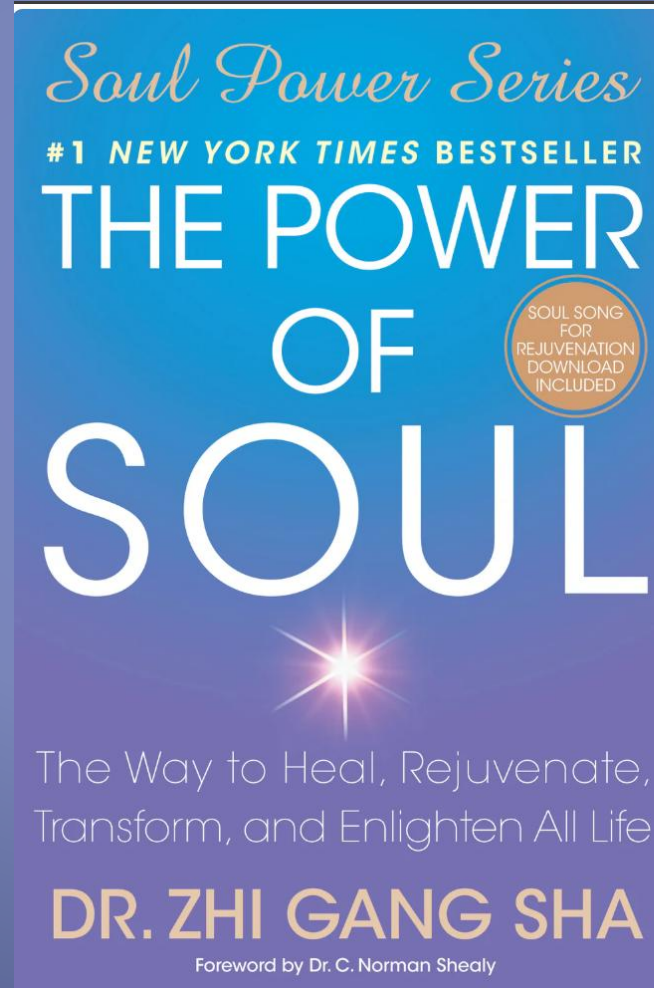

Even the formal organic farming principle and certification system require following **“TRUE NATURE”** ... thus go to the Soul level which carries the blueprint!

HOW to know what to do?

Strive to become a fully developed human, upgrade frequency, raise consciousness, so can communicate with the soul; plug into the highest level, the Source

Study Soul Science

What is the Law of Shen Qi Jing? - Master Sha

The Power of Soul

\$15.00 CAD

The Power of Soul teaches about how the power of soul can align our soul, heart, mind and body to maintain good health, vitality, renewal, longevity, intelligence, and more. You will learn about soul marketing, soul orders, karma (the root cause of success and failure in every aspect of life), soul blessings for every aspect of life (including relationships and finances). You will learn about soul enlightenment.

"In the twentieth century, *mind over matter* was emphasized. In the twenty-first century, *soul over matter* will bless all life. "This one-sentence secret is the essence of *The Power of Soul*.

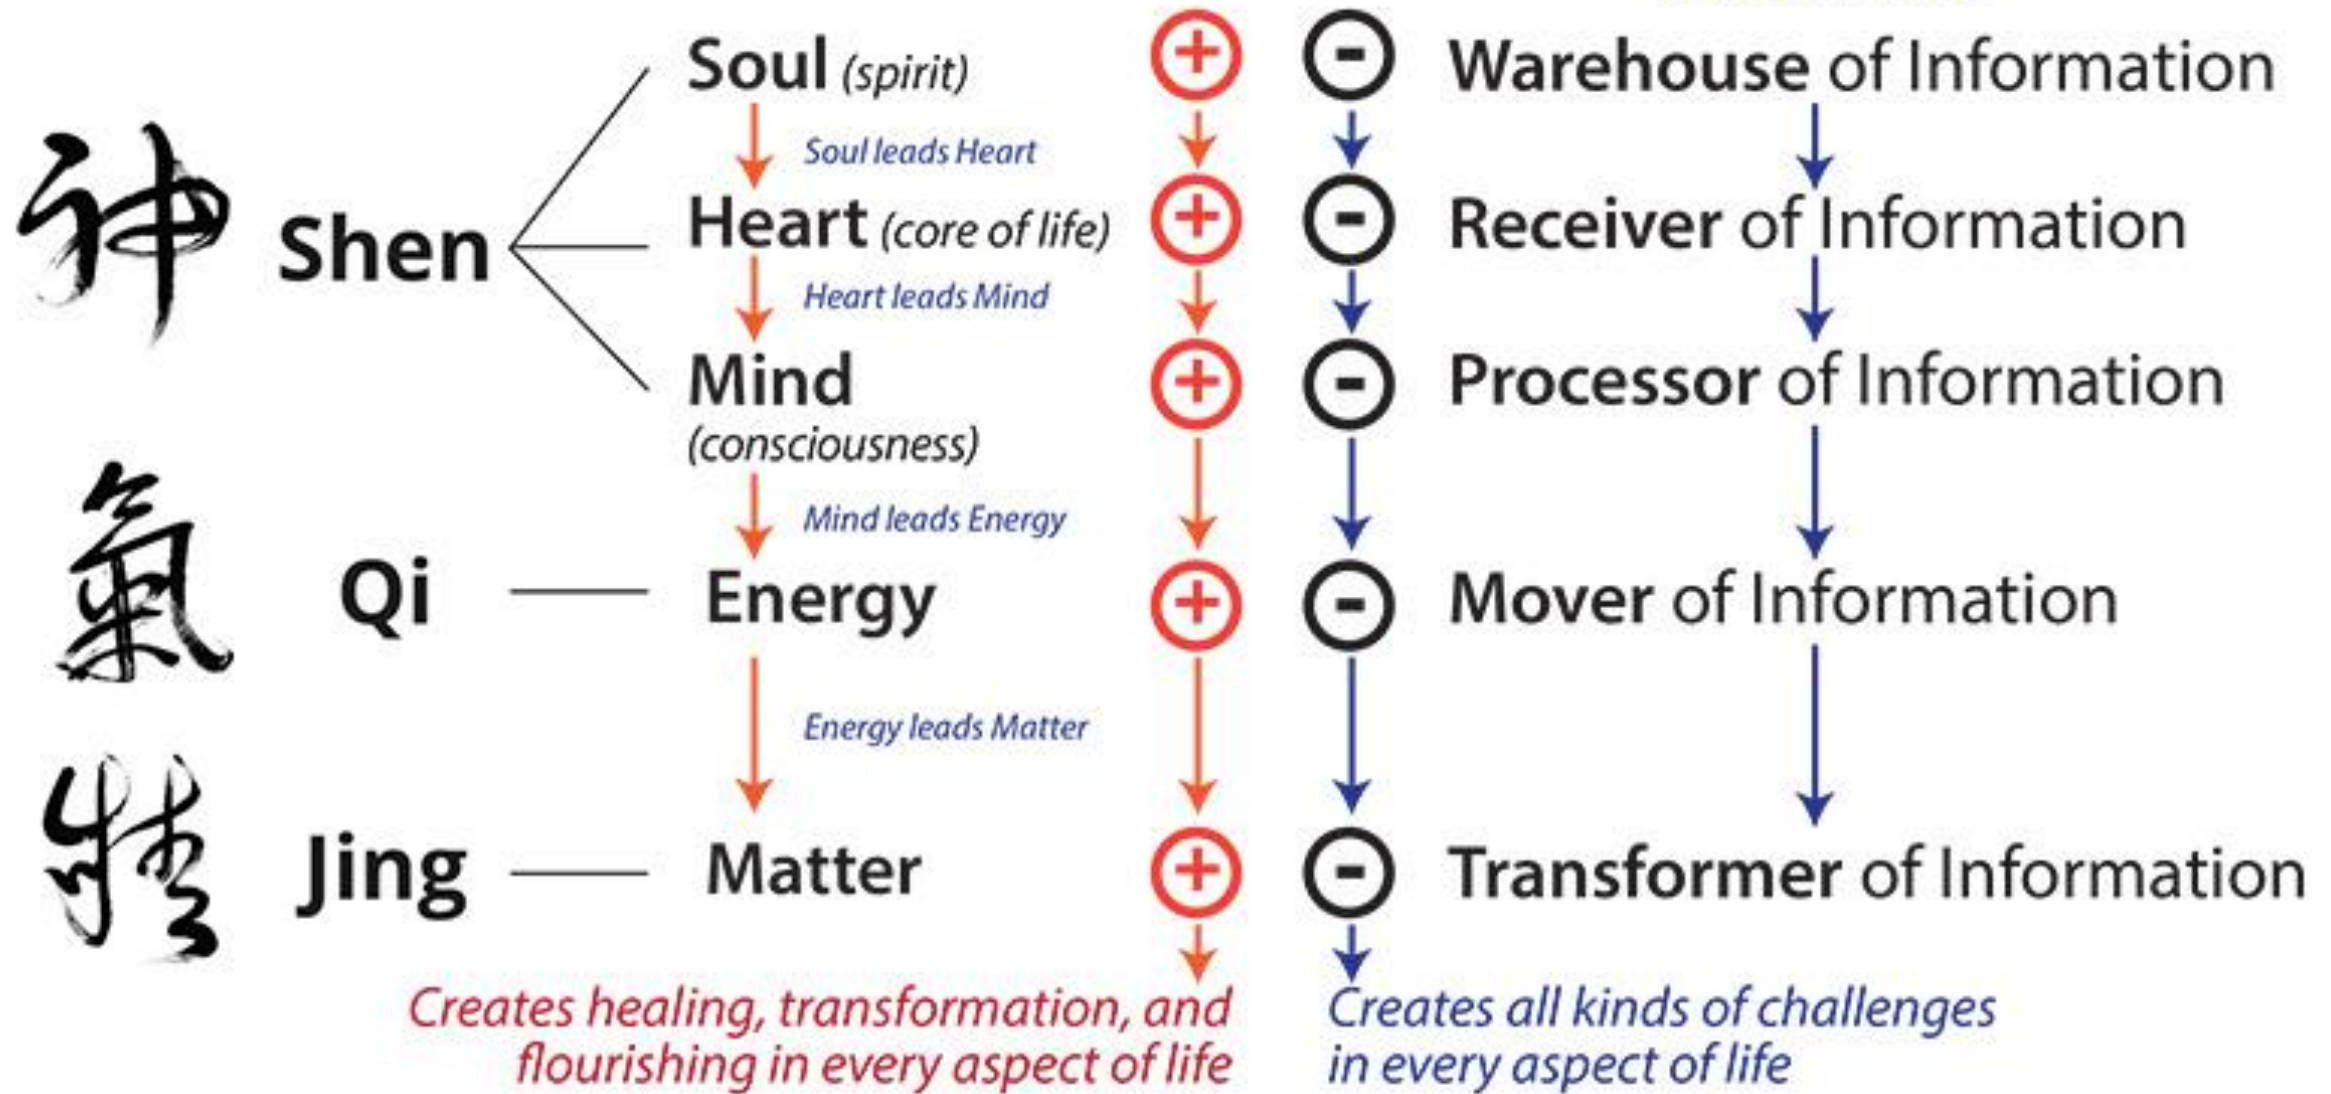

Destined to become a 21st century classic, this book is the cornerstone of Master Sha's Soul Power Series.

The Power of Soul teaches about how the power of soul can align our soul, heart, mind and body to maintain good health, vitality, renewal, longevity, intelligence, and more. You will learn about soul marketing, soul orders, karma (the root cause of success and failure in every aspect of life), and soul blessings for every aspect of life (including relationships and finances). You will learn about soul enlightenment.

Tao Science

What Is the Law of Shen Qi Jing?

[What is the Law of Shen Qi Jing? - Master Sha](#)

The Law of Shen Qi Jing is a universal law of ancient Tao wisdom that is more than 5,000 years old. Dr. and Master Sha and Dr. Rulin Xiu (a renowned quantum physicist and string theorist), co-created Tao Science, the science of creation and grand unification. Tao Science demonstrates how the physical and spiritual aspects of our existence are one. It explains in scientific terms various universal spiritual laws, including the Law of Shen Qi Jing.

Some aspects of the Shen Qi Jing Law may already be familiar to you. For example, Qi is energy and Jing is matter. Natural and Quantum Science already show us that every thin. Tao Science takes us beyond what we know to that which we need to know – which is Shen, Tao Science and the Law of Shen Qi Jing state that everyone and everything is made of Shen, Qi, and Jing.

Shen includes soul, heart, and mind. So, the Law of Shen Qi Jing takes us beyond energy and matter.

Tao Science helps us understand the following:

Soul

Soul is the content or information aspect of all that exists. The soul is the warehouse that contains all the information of someone or something.

Heart

Heart is the receiver of this information.

Mind

Mind is the processor of the information that the heart receives. Mind is the processor of the information that the heart receives.

Energy

Energy actions the information which the mind has processed.

Matter

Matter is the physical manifestation of information, and that which we see or experience.

Together, the soul, heart, mind, energy, and matter of everyone and everything form the information system or Shen Qi Jing System of everyone and everything.

How The Shen Qi Jing System Flows

This Means: Soul Informs The Heart. Heart Leads The Mind. Mind Moves Energy. Energy Moves Matter.

Matter creates new information that is stored by the soul.

The important wisdom to realize is that everything begins and is rooted at the level of the soul (information level). The Law of Shen Qi Jing tells us that soul or information is the boss; it is the root cause of all things we experience in our physical reality.

Using the Law of Shen Qi Jing, we can not only understand our reality better, but also be empowered to transform every aspect of our experience.

[What is the Law of Shen Qi Jing? - Master Sha](#)

The Story of Bapa Wayak, a Hanunuo Mangyan Spiritual Leader

A scientist (N Perlas), visited a tribe with some foreign students, was baffled by the Hanunuo farming system, *in his thoughts he wondered... how Shaman Bapa Wayak decide which crops and varieties to plant and combine in their swidden farm.*

The Hanunuo shaman intuitively knew his thoughts and answered, “*I simply ask the soul of the plants/seeds and they instruct me on what to do*”. So our wise elders know about the soul!

Final words, Conclusions

- Consider, be open, and learn to do conscious “subtraction and addition”.
 - Consciously change narratives
 - Ancient is not primitive.
 - People then were intuitives, creatives
 - We are entering a new earth phase, everything is changing, and we need to change, or we get stuck.
 - Schooling, teaching, and my work taught me, gave me the space, and in a surprising way enabled me to follow my true nature, my life’s Purpose.
 - Stick to authenticity, to the soul’s dictate ... in education, agriculture, health, governance, economics and in all other aspects.
 - Find out what is really going on in the world (explore other information sources).
 - Learn the deep power of man and realize the ways that we have been dehumanized through millennia.
 - Try to learn about Tao science, secrets and practices
- Questions to answer by yourself:**
- What if the student cannot go to school?
 - What if the student does not get a College diploma?
 - What if the graduate cannot find a job?
- Try answering in a very conscious way*

Pamela Fernandez hailed from Cebu, an island in central Philippines. In 1973 she moved to the northern part of the country – near Manila, specifically to the University of the Philippines Los Banos (UPLB, Laguna province) for her BS and MS studies in Agriculture (*Major in Agronomy – Crop Science, Plant Breeding, Crop Seed Physiology; Minor in Biochemistry*). She also spent time in Nebraska, USA in 1982-1987 for her PhD.

She held a teaching profession (1978-2021, aprox 40 years) in crop and seed science/technology, which she brought to organic, ecological and quantum level. Her formal interest in indigenous knowledge systems which started in the late 80's enabled her to enrich, deepen and widen the reach of quantum agriculture.

Her research and extension/community outreach also provided her more substance in her framework. The last incorporation she made in her work just before retirement is Soul Agriculture.

Discover Dr. Pamela Fernandez, retired professor of UPLB, and find out how she was able to "get outside of the box" and into quantum agriculture and beyond!

June series of Modern Physics Meets Ancient Wisdom

Retired Faculty Member of the University of the Philippines at Los Baños and advocate of Sustainable Agriculture, Tao Science, Agricultural Science and Indigenous Wisdom

These events are organized by —

Cynthia Hamilton, PhD

Certified Master Teacher & Practitioner of Tao Academy™

<https://unifiedfieldbc.com/cynthia-hamilton>

The event announcement posted in FB

Welcome to Modern Physics Meets Ancient Wisdom!

Join us for a fascinating interactive introductory series where **cutting-edge scientific discoveries** intersect with **timeless philosophical teachings**.

Led by Cynthia Hamilton, PhD (Applied Science), dive into thought-provoking discussions, engaging presentations and practices, based on [Tao Science](#), co-created by a Tao Grandmaster and World Renowned Healer and a Quantum Physicist and String Theorist.

This is a unique opportunity to expand your awareness, connect with like-minded individuals, and explore the connections between **modern theories** and **age-old wisdom**. Bring your curiosity; no pre-requisites.

Reserve your spot today!

Mondays from 02 - 30th June 2025 inclusive
5pm PT/8pm ET/11am AEDT (Tuesdays)

Sample publications posted in the internet
